

I am sick and tired of other organizations such as NAB, ACLU and the list goes on and on and on, deciding on what the majority of the people in this country should have and not have. Now they are trying to reduce my listening choices that I pay for. Why should they have a say in my service of getting weather traffic reports while I am on the road or vacationing with my family. This service can save a travelers life or ckeep a traveler from getting stranded. I can tune in to one of these stations and get clear and trouble free reception no matter where I am located or going. I don't have to search for other radio or TV stations as I travel in and out of areas to get the weather or traffic conditions and I may never get a station with this information at all. I am paying for it and I want this service so tell these money hungry idiots that want to controll us and can't provide this service in a non-hassle clear way that xm radio can to go mind there own business and quit bothering us happy xm coustomers. I you let these groups have their way my costs will only go up and I will be ruining our rights as xm costomers. I think we need to have a vote on this subject. Finally, Please do not allow the money that these groups can offer you influnce your vote and do what the majority of the people want. My vote as a public citizen, registered voter, and xm radio subscriber, vote no,no,no to this HR 4026 bill. I will bet the guys that have introduced this bill are getting a ton of money from the NAB for just introducing this bill and will get a lot more later if it passes.
